

Air Waybill Management Software - AMS

The Air Waybill Management Software provides an easy and effective data capture of Air Waybills and settlement to IATA/CASS. It is a Windows based system and fully network capable. It offers the user a detailed visualization of the Air Waybill data on the screen.

The system links the Air Waybills with the agency debit and credit memos/DCMs for a smooth workflow and discovery of connected documents. Comprehensive search functionalities per AWB number, agency number as well as per date of capture and settlement are performed.

Additional charges e.g. fuel surcharges are calculated automatically. As a result data capture errors can be minimized. The export and upload of the CASS-files into the IATA/CASS system is easy to handle. All executed exports can be displayed. Wrong export-files can be deleted, repeated and uploaded again.

The AMS supplies a variety of detailed cargo turnover statistics of all settled AWBs and DCMs, sorted per agent, agent group, origin, destination, flight number, flight date, yield and ranking of the top selling agents. Additionally analyses about specific accounting periods and year to date comparisons are supported. The statistics are released in Excel for further easy processing, distribution per email and storage. They can be straightforwardly adapted to company reporting standards.

Your benefits are:

- fast data capture of AWBs/DCMs
- prompt settlement via IATA/CASS
- increase in quality and speed through automatic net-rate calculation
- process costs are reduced considerably
- simplifying employee's routine work

Corporate Profile

Lamberth Airline Solutions is a service provider for the international air transport industry.

We serve over 15 airlines in more than 20 countries.

We market our **proprietary software, which our customers use to optimize their back office activities** e.g., in their accounting, sales and direct marketing departments. We also offer our customers a complete range of outsourcing services for complete back office processes, supported by software systems and a professional and highly knowledgeable staff.
